

The Inter-municipal Public **Consortium** of the Western Metropolitan Region of Sao Paulo (**CIOESTE**) was legally established in November 2013. It includes 8 of the 39 Municipalities of Metropolitan Sao Paulo; **Barueri, Carapicuíba, Cotia, Itapevi, Jandira, Osasco, Pirapora Do Bom Jesus and Santana Do Parnaíba.**

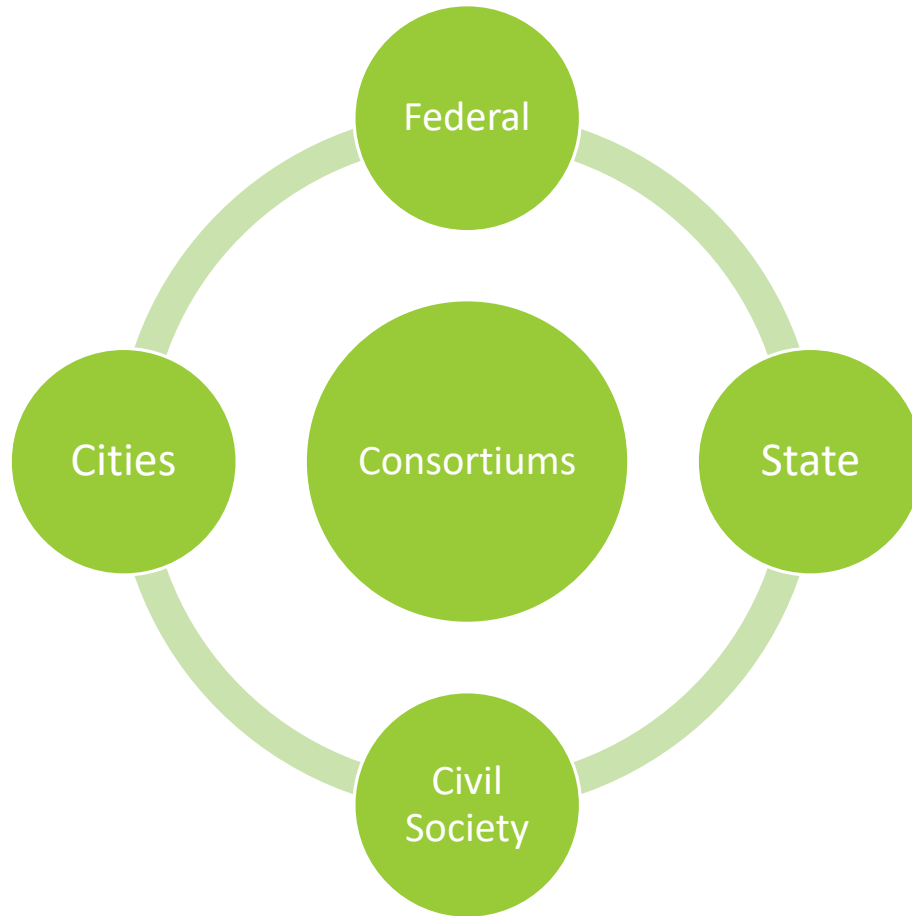

CIOESTE is a governmental entity regulated by federal 11,107 issued on April 6<sup>th</sup> 2005 .  
The inter-municipal consortium is an agreement to cooperate on a common agenda  
having pooling efforts to achieve specific objectives:

- **Economic Regional Development**
- Infrastructure
- Urban Development
- Health
- Human rights and social inclusion
- Public Safety
- Capacity Building
- Education, Sport e Culture
- Environment

Regulated by federal  
Law 11.107/2005

# Multi level Governance

The Consortium entity stand for a new level of governance at the public sector in Brazil, and has a privileged position to dialogue with, cities, state and national officials as well as civil society actors.

**FY 16-17: AGENCY PRIORITY GOAL**

**Climate Change**

Combat global climate change by supporting the transition to high-performing, low-carbon economies. By September 30, 2017, U.S. government partnerships with developing countries to refine and implement their low emission development strategies (LEDS) will result in achievement of 100 (from a baseline of 46) major milestones which contribute to significant measurable progress toward achieving domestic and international contributions to global greenhouse gas reductions. At least 4,000 developing country government officials and practitioners (from a baseline of 2,000) will strengthen their LEDS capacity through participation in the LEDS Global Partnership (GP), and that capacity will result in strengthened LEDS policies or measures in 24 countries (from a baseline of 0).

THEMES: NATURAL RESOURCES AND ENVIRONMENT INTERNATIONAL AFFAIRS

Overview

Strategies

GOAL OVERVIEW

The focus of this Agency Priority Goal (APG) is to enable economic growth in developing countries in a manner that supports

Climate Change | Prog

practitioners. In particular, participation in the LEDS GP led to strengthened LEDS policies and measures in Brazil, Uruguay, Vietnam, Argentina, and Nigeria.

For Brazil, the CEO of CIOESTE, an association of eight city governments in Sao Paulo, participated in the 2015 LEDS GP Annual Workshop in Punta Cana. This led to a request for assistance from the Remote Expert Advice on LEDS (REAL) service to strengthen capacity of CIOESTE and the respective municipalities to develop and maintain a greenhouse gas (GHG) and energy inventory system. The CIOESTE completed the inventory system, which informs policy decisions and prioritizes specific climate actions at the subnational level. The CIOESTE has used the GHG inventory, resulting in an economic development proposal that includes submission of GHG emission mitigation targets to the state assembly by July for approval, and is expected to be further utilized for prioritizing projects and policies. Moving ahead, CIOESTE plans to host a workshop in FY 2016 quarter three with participation from LEDS GP and CIOESTE officials, technical staff, the municipalities, and Federal and State governments.

During the workshop, CIOESTE will launch the energy and GHG monitoring effort as part of their commitment to green growth. CIOESTE will train its officials and municipality representatives to develop inventories to track GHG emissions, which will inform policymaking and prioritization of projects.

Uruguay built capacity during the 2015 LEDS GP Annual Workshop. This informed and strengthened the development of the National Climate Change Policy and the development of a Global Environment Facility (GEF) transportation proposal. Through participation in the LEDS Global Partnership, the National Energy Directorate of Uruguay improved its technical capacity in: 1) low emission transport planning; 2) green funding; 3) short-lived climate pollutants; 4) co-benefit analysis; and 5) integration of climate resilience in LEDS. National Energy Directorate staff indicated that the improved technical capacity gained through LEDS GP membership is contributing to a strengthened National Climate Change Policy in Uruguay.

In 2014 a LEDS GP expert for the Subnational Integration of LEDS (SNI) Working Group provided a technical review of Vietnam's Thanh Hoa Provincial Green Growth Action Plan. SNI incorporated the comments from the review into the action plan, which was approved in FY 2016 quarter two. In 2016, the Department of Planning and Investment of Thanh Hoa requested additional support on strategies and best practices to mobilize investment for the implementation of the projects under the provincial green growth action plan. These recommendations are expected to assist the provincial officials to develop concept notes how to obtain financing for specific projects. It will also help facilitate a panel discussion on the Green Growth Action Plan at the 2016 Asia LEDS Platform Forum planned in FY 2016 quarter three. The U.S. Government will report the impacts of this additional support at that time.
